

Series Production or Individual Pieces

Development/Service

- Customized product development
- Test equipment for prototypes
- Pre-series and small series
- Load change system to conduct longevity or endurance tests under pressure, vacuum, temperature and motion

Manufacturing

- Machinery and production processes are subjected to continuous improvement
- In-house tool development and design for cost-efficient solutions
- Highly flexible production layout to meet the requirements of either small or large volume series production runs

Quality assurance

The implemented quality management system is certified according to DIN EN 9100:2009 "Aerospace series - Quality management systems" (technically equivalent to AS 9100 & JISQ 9100). This certification corresponds to QSF-C of the German Aerospace Industries Association (Bundesverband der Deutschen Luft- und Raumfahrtindustrie e. V. - BDLI).

Our products meet the requirements of DIN 5510-2, ISO 5659-2 and of NF F 16-101. Qualification according to CEN/TS 45545 is in preparation.

A MASTERFLEX GROUP COMPANY

Simply flexibly connected

Matzen & Timm is a specialist in the development and manufacture of demanding connection- and hosesystems made from innovative high-tech rubber materials for a variety of industrial applications. Our products are manufactured to customers individual requirements. In this manner even most complex designs from prototype through to production can be realised.

We offer individual solutions for ambitious applications! Approach us!

Airflow in engine section

Whether aerosol-generated air, pure air or charged air (turbo charger): Whenever air being conveyed from A to B and standard parts off-the-shelf do not fit, Matzen & Timm have the solution.

Cooling water section

Besides standard products we offer individually designed hoses and form parts for the radiator system. If requested we also manufacture hoses for the high temperature area.

Standards in stock

Matzen & Timm hold stock of a variety of standard items. Stock content is continually adjusted to offer the best possible delivery performance.

Ventilation

All products are hand made from specifically engineered rubber materials. Beside the standard program the individual solutions for the customers make the differences that generate extra benefit for our customers.

Drainage / roof drainage

If rainwater or condensates need to be drained, our proofed reinforced hoses are the solution.
